EDUCATION

Indira Gandhi Delhi Technical University for Women, Delhi
Bachelor of Technology in Computer Science and Engineering

2024 – Present
CGPA: 9.1

EXPERIENCE

Department of AI & DS, IGDTUW
June 2025 – July 2025

AI-Powered Full Stack Development Intern
Delhi, India

- Led backend development for a production-scale Lost & Found web application, delivering **10+ REST APIs** and designing MongoDB schemas managing **3 lifecycle states** (Active, Matched, Returned) for reporting, search, claims, and status updates.
- Collaborated with **2+ frontend developers and mentors** to resolve integration issues and improve end-to-end system reliability.
- Integrated AI-based similarity logic to narrow search results, reducing manual item scanning effort during recovery.

PROJECTS

Lost & Found — College Platform [GitHub]
Node.js, MongoDB, React.js, AI

2025

- Built a full-stack web platform enabling users to report, search, and claim lost items.
- Engineered normalized MongoDB schemas and backend logic managing **3 lifecycle states** with real-time transitions.
- Enabled image uploads, advanced search filters, and AI-assisted similarity matching to improve item discovery accuracy.

NeuroNexus — AI-Powered Early Dementia Detection Platform [GitHub]
Kotlin, FastAPI, XGBoost, Whisper, OpenCV, Firebase

2026

- Built an AI platform analyzing **3+ modalities** (speech, memory, facial cues) for early cognitive decline detection.
- Developed backend with **FastAPI** integrating ML models (XGBoost, Whisper) to generate **real-time risk scores**.
- Designed **5+ features** including cognitive tests, dashboards, and caregiver alerts for continuous monitoring.

IoT-Enabled Smart Miner Safety Helmet [GitHub]
ESP32, Embedded C, Cloud IoT

2025

- Created an IoT safety helmet monitoring **4 parameters**: gas concentration, temperature, humidity, and visibility.
- Interfaced MQ-135, DHT11, and LDR sensors with ESP32 to trigger alerts in **<100ms** for hazardous thresholds.
- Streamed sensor data to ThingSpeak for continuous cloud-based monitoring and historical safety analysis.

TECHNICAL SKILLS

Languages: Python, C++, C, JavaScript, Kotlin

Backend & Databases: Node.js, MongoDB,

Web Technologies: HTML5, CSS3, React.js, Git/GitHub

Tools & Platforms: VS Code, Android Studio, Arduino IDE, ESP32, ThingSpeak, Streamlit

ML & Data: Scikit-learn, XGBoost, Pandas, NumPy

Core CS: Data Structures Algorithms, Object-Oriented Programming, Software Engineering

ACHIEVEMENTS

- Top 20 Nationwide Finalist:** Innov8 3.0 Hackathon (Eightfold AI x ARIES, IIT Delhi).
- Finalist:** 0 to 1 Hackathon (E-Summit '25, IIIT Delhi).
- Selected:** Internal Round of Smart India Hackathon (Selected among Top 50 Teams.)
- First Runner-Up:** Secured second place in the IoT Research Showcase among our batch for developing an IoT-enabled Smart Miner Safety Helmet focused on real-time worker safety monitoring.

ROLES OF RESPONSIBILITY

Coordinator, Training & Placement (TnP), IGDTUW

2025 – Present

- Coordinated corporate outreach and logistics for multiple recruitment drives and technical workshops.

Coordinator, Surveillance Drone Project

Delhi Police Collaboration

- Trained and assisted **100+ women police officers** in drone flight operations, safety procedures, and troubleshooting.

Coordinator, Debate Society, IGDTUW

2024 – 2025

- Managed coordination for inter-college debate events, including outreach, scheduling, and on-ground logistics.
